**INSTRUCTIONS FOLLOWING REMOVAL OF WART**

**TODAY**

Go directly home-elevate feet while resting.  
Restrict your activities somewhat today.  
DO NOT WET \_\_\_FOOT TONIGHT.  
Keep bandages DRY and CLEAN.  
You may notice some oozing through the bandages, this is normal.  
If bandages become saturated with blood, change it and elevate foot.  
Anesthesia will last 3-6 hours (sometimes longer).  
For discomfort take Tylenol, or \_\_\_\_\_.

**TOMORROW**

Remove bandage and wash with warm soapy water.  
Apply pad to area with hole over wound site.  
Apply antibiotic cream.  
Cover with gauze bandage or bandaid.  
If any problems arise, call the office (24 hour answering service).
